**Register by phone:**

Call Karen Litwack at (312) 357-4717

*Complimentary dinner and program; Limited space available*

This program is designed for nurses and nurse practitioners who want to learn to use family health history to identify and support patients and families at high risk for hereditary cancer and become familiar with opportunities for intervention which will make an impact on health outcomes. Collaboration with genetics professionals will be highlighted.

Upon completion of this activity, participants will be able to:

- List risk factors for hereditary cancers in women
- Identify the family health history patterns of patients at high-risk
- Describe the process of consultation and collaboration with geneticists and genetic counselors

**Faculty:**

- **Amy Boesky**
  Author of *What We Have, A Family's Inspiring Story About Love, Loss and Survival*
  Associate professor of English literature at Boston College

- **Peter Hulick, MD, MMSC**
  Interim Medical Director
  NorthShore University HealthSystem Center for Medical Genetics
  Board Certified in Clinical Genetics and Internal Medicine

This program is being offered for 1.25 Nursing Contact Hours.

*NorthShore University HealthSystem is an approved provider of continuing nursing education by the Illinois Nurses Association, an accredited approver by the American Nurses Credentialing Center’s Commission on Accreditation.*

*The Chicago Center for Jewish Genetic Disorders is a support foundation of the Jewish Federation of Metropolitan Chicago.*
